Somers Engineerings Profile

Design and Build

Somers Engineering Limited was established in 1987, as a Civil Engineering company, and has carried out major construction projects all over East and Central Africa. The design and build part of the company was established over the last 10 years, we started with development of few units to the present day where we are now involved with billion shilling projects that include; multi-storey residential flats to high-end housing estates. The company provides services such as construction management, project management and also carries out joint ventures with potential investors in real estate.

The company has its own construction equipment and is staffed with highly qualified professionals to execute projects. A flexible and efficient service of the highest quality is offered and the partners playing a key role in the everyday supervision and augmentation of work. Whenever the need arises, the company has a wide network of both international and local partners to execute projects.

The company believes that the most economical solution must be sought to any task. This takes into consideration the important aspects of a fair return on investment in our projects. All directors pursue the development of the best solution, whether it is of a conventional nature or original work. The company has developed a reputation for providing clients with expert advice and initiating an immediate and effective response to critical issues.

Somers Engineering Ltd has a wide experience in the implementation of projects in Sub-Sahara Africa and continues to look for opportunities in the region.
